

**UNITED STATES DISTRICT COURT  
FOR THE EASTERN DISTRICT OF WASHINGTON**

---

In Re the Marriage of:

DANIEL LUKE SCHWARTZ

Petitioner,

and

SHARON ROSE HINNENDAEL

Respondent.

---

Case No. 20-CV-01028

---

**DECLARATION OF MARC J. ACKERMAN, PH.D.**

---

Pursuant to 28 U.S.C. § 1746, the undersigned, Marc J. Ackerman, Ph.D., makes the following statements under penalty of perjury under the laws of the United States.

1. I am a founding faculty member, former Dean, former Chair of the Forensic Psychology program and Professor Emeritus at the Wisconsin School of Professional Psychology. I have been involved in over 2000 Forensic Psychology cases throughout the world and have testified approximately 700 times. I am a past President of the Wisconsin Psychological Association and served on its ethics committee for seven years, chairing it for two years. I recently submitted an article for publication with Dr. James Bow of a 35-year retrospective summarizing dozens of studies defining the standard of practice he and I performed with our associates. I have performed at least a dozen *Daubert* challenges over the past decade throughout the country and recently co-authored a chapter on how to perform *Daubert* challenges in a book written for attorneys. My CV attached lists my publications.

2. I have been asked to review Dr. Alan Jaffe's "Psychological Evaluation of Hinnendael and Children," dated September 6, 2020 on behalf of counsel for Daniel Schwartz.

3. Upon review of this report, without the benefit of Dr. Jaffe's file or test data, I have several concerns about the report.

4. None of Dr. Jaffe's opinions are given to a reasonable degree of psychological certainty.

5. Dr. Jaffe does not fully report the results of the MMPI-2, PAI and TSI-2. He states that elevations exist, but does not report the extent or the impact of these elevations. This is significant in light of certain decisions Sharon made regarding leaving the family's home for another country. While the elevations he describes indicate pathology, unless the test data are reviewed, it cannot be known whether the results are such great concern that Dr. Jaffe wants to minimize them, or whether there are other reasons for not reporting them.

6. The accepted rules of scientific inquiry adopted in *Daubert v. Merrell Dow Pharm., Inc.*, 509 U.S. 579 (1993) requires experts to consider alternate hypotheses and explain why they don't apply. Dr. Jaffe did no such consideration of alternate hypotheses.

7. With regard to consideration of alternate hypotheses, Dr. Jaffe did not fully evaluate Sharon's historical substance abuse and did not consider the effect of past events, including her career in films and the pornography industry on the PTSD diagnosis Dr. Jaffe reached.

8. All data collected are from Sharon, her family and friends, with no response from Daniel or others who might provide conflicting information. The report is a summary of Sharon's view of her situation alone and thus, of lesser value and reliability.

9. Dr. Jaffe uses outdated, archaic and refuted articles to reach his opinions about the effects on children of domestic violence and ignores almost fifty years of new research in this area.

10. The American Psychological Association Ethics Code and The Specialty Guidelines for Forensic Psychology both state that psychologists cannot give opinions about individuals they have not examined. Dr. Jaffe did not meet with Daniel, determine the full nature of his treatment given restrictions on residential treatment during this time of COVID-19, or obtain updated information about his drug test results after May 13, 2020, even though Dr. Jaffe's report was signed September 6, 2020, or hear his response to Sharon's concerns.

11. In sum, the Court is in the position of relying on an incomplete report, that does not comply with APA code requirements, does not meet the *Daubert* requirement of considering alternate hypotheses, relies on Sharon's view without checking it out, does not provide a complete analysis of the test results, used outdated materials in support of his opinions which are not to a degree of psychological certainty, disregards relevant information and issues and does not consider the negative impact on the children of being raised in a father absent home.

12. Based on my experience as set forth in paragraph 1, It is my opinion to a reasonable degree of psychological certainty that this report is substandard, and does not meet the standard of practice.
